

Did you know that you have the right to refuse to dissect animals in Yukon?

It's true! Each year, countless animals (including frogs, cats, and foetal pigs) are cruelly killed and then cut up in classrooms across the country—even though humane alternatives exist. Studies have shown that students who use alternatives to dissection perform just as well as—if not better than—students who cut up animals. You don't have to dissect animals! Explain to your teacher that you won't be dissecting and that the curriculum gives you the right to say NO to cutting up animals in Yukon:

Students should observe the principal features of the circulatory system, utilizing models, dissections or computer simulations, and to identify those structures through the use of drawings or photographs.

Dissection is unnecessary and cruel. Stand up for animals, and exercise your rights. Choose not to dissect.
